Students must be prepared to face the 21st century and beyond. Jobs that are in existence today will be obsolete in 10 years, and jobs that have not even been thought of yet will be waiting for our students as they graduate from high school and college. That's why it's essential for students to be prepared for future technology advances. Students will learn how to work together to complete various projects, and create educational memories that will last a lifetime. Middle school summer technology camp 2009 will focus on computer animation skills and projects.
